Data & AI Governance · Data Quality · Operations

Chicago, IL (open to relocation) · +1 774 253 7469 · ady.states@gmail.com · [linkedin.com/in/ady555](https://www.linkedin.com/in/ady555) · github.com/adeebansar

SUMMARY

Data and operations professional with 10+ years across IT service delivery, business process, and portfolio governance — including data governance, SOP standardization, and data-quality work at Novartis. I turn messy operational data into governed, trustworthy reporting, and I build AI and automation tools (Python, RAG, data-quality engines) to do it faster and at lower risk. MS in Computer Science. Targeting data governance, data quality, and AI governance roles where operational rigor meets responsible AI.

CORE COMPETENCIES

- **Data governance & quality:** data-quality dimensions (completeness, validity, accuracy, consistency, uniqueness, integrity, timeliness), SOP standardization, data stewardship, metadata, data reconciliation, controls, audit trails, RAID tracking
- **AI & responsible AI:** LLM/RAG application building (Python, Streamlit, LangChain, Chroma, vector embeddings), prompt and agent workflows, AI risk awareness (PII exposure, hallucination, model drift, auditability)
- **Data & reporting:** SQL, Power BI, Tableau, Qlik Sense, Advanced Excel, KPI dashboards, data visualization
- **Operations & process:** ITIL, incident / change / problem management, process improvement, process mapping, root-cause analysis, SLA / SLO / MTTR, service delivery
- **Program & stakeholders:** portfolio coordination, project governance, status reporting, cross-functional stakeholder management, team leadership (70+ people)

EXPERIENCE

Business Analyst

08/2024 – Present

VJ Tech Solutions, Remote, USA

- Gathered business and reporting requirements and rebuilt Power BI and Tableau reporting into governed, trusted dashboards — improving reporting accuracy by 30% for leadership decisions.
- Standardized data definitions and functional documentation and partnered with technical teams on data-driven process improvements that reduced resolution and turnaround time by 25%.
- Analyzed change and deployment workflows and introduced requirement and pre-implementation checks that increased deployment success by 18%.
- Translated operational pain points into clear requirements, data-quality rules, and process optimizations across business and technical teams.

Operations Manager

08/2020 – 08/2022

WFM Technologies Pvt Ltd, Hyderabad

- Led 70+ support agents: +20% productivity and -10% attrition through coaching, performance management, and process standardization.
- Reduced average handling time by 30% and improved satisfaction by 25% by redesigning workflows, escalation paths, and quality routines.
- Built Power BI KPI dashboards and SLA scorecards governing team productivity, backlog, and service performance.
- Standardized SOPs, reporting cadences, and controls to improve operational readiness and data consistency.

Operations Coordinator, Portfolio Strategy & Implementation

05/2019 – 03/2020

Novartis, Hyderabad

- Implemented data governance and SOP standardization across functions, improving data quality by 25% and aligning data definitions and operational documentation.
- Supported portfolio governance, implementation tracking, and status reporting — reduced project delays by 20% and raised project success rate by 15%.

- Reconciled and visualized operational data in Power BI and Tableau, cutting reporting and processing time by 40%.
- Tracked risks, issues, actions, and dependencies (RAID) to strengthen executive visibility and governance discipline across workstreams.

Team Manager, IT Technical Support

07/2016 – 04/2019

WFM Technologies Pvt Ltd, Hyderabad

- Introduced QA programs, coaching, and performance dashboards: +25% call quality and +15-point CSAT.
- Reduced operational costs by 10% through lean resource allocation and process improvement.
- Maintained SOPs, knowledge management, and documentation standards to reduce repeat issues.

Team Leader / IT Technical Support Associate

09/2012 – 07/2016

XPM Technologies Pvt Ltd, Hyderabad

- Led and coached support teams (10+): +20% productivity, -10% attrition.
- Held 90% SLA adherence and cut escalations by 25% through coaching systems and consistent ITSM workflows.
- Documented issues and resolutions in centralized knowledge repositories, improving knowledge-management effectiveness by 50%.

FEATURED PROJECTS

Data & AI Governance Dashboard

Python, pandas, Streamlit

github.com/adeebansar/Data-Governance-Dashboard · [live demo](#)

- Built a tool that scores any dataset across the eight standard data-quality dimensions, groups failures into plain-language discrepancy categories, and drills into the exact failing records.
- Added an AI-governance data-risk module — personal-data (PII) exposure, representation / bias risk, and AI-readiness — mapped to the NIST AI RMF and EU AI Act.
- Pure-function rule engine with auto-inference for any CSV; 23 tests; no external APIs.

RAG Knowledge Assistant for IT Operations

Python, Streamlit, LangChain, Chroma

github.com/adeebansar/IT-Ops-RAG-Knowledge-Assistant · [live demo](#)

- Built a retrieval-augmented assistant that answers natural-language questions over SOPs, runbooks, and policies using semantic embeddings, with transparent source retrieval so every answer is grounded in cited documents.

AI Ticket Triage & Routing

Python, pandas, Streamlit

github.com/adeebansar/ai-ticket-triage · [live demo](#)

- Built a rules-based engine that triages IT service-desk tickets for severity, priority, SLA risk, and routing to the right queue, with the owning team and a recommended next action.
- Validated routing against a labelled gold set (24/24); surfaced as a colour-coded dashboard with KPIs and SLA flags.

EDUCATION

- **MS, Computer Science (Information Systems)** — Concordia University Wisconsin, 2024
- **MBA, Human Resources** — Osmania University, India, 2019
- **BTech, Computer Science** — Jawaharlal Nehru Technological University, India, 2012

CERTIFICATIONS & DEVELOPMENT

- Introduction to AI for Work — DataCamp, 2026
